ABOUT ME

I'm Sepehr, a full-stack software engineer and web developer based in San Francisco Bay Area, CA. I love tech and have been a tech-enthusiast since 7 years ago, and recently I decided to roll up my sleeves and be the builder of the things that have always interested me. During the past 4 years, I've founded and worked for different startups in various positions, which allowed me to meet many nice talented people and entrepreneurs. As a software engineer, I enjoy using my skills to make innovative things that solve real-world problems and I love to bridge the gap between engineering and design. I'm open to any opportunities that will allow me to expand my skill-set further and grow in my career.

EXPERIENCES

2020 **React Developer & Business Operator** @ Hike Studio
International
Gained the trust of the managers from my previous job and they allowed me to collaborate with them on their other project as a developer.

2020 **Software & Web Developer** @ Karjoo Next
Karjoo+, Qazvin, Iran
Learned how to properly use the Git version control system and handle branches in a team to avoid conflicts and have a clean codebase.
Handled state management in client-side apps with React hooks while building various forms and later on suggested the use of libraries like Formik.
Implemented both back-end and front-end form validations by creating models and schemas, using RegExp and libraries like Yup and Fonk.
Managed authentication and authorization in several server-side Express apps, salted and hashed user passwords in the database, and implemented protected routes on client-side React apps.
Was a good team player and helped managers facilitate group collaboration.

2019 **Co-Founder, Manager, & Instructor** @ DaneshmandSaaz Inst.
Qazvin, Iran
Co-founded and managed a computer skills institute and taught several software skills as one of the instructors. This opened the door for me to get more teaching requests which continue even to this day for subjects like JavaScript and web dev.

2018 **VR Simulation Assistant Developer** @ QIAU
QIAU, Qazvin, Iran
Modeled and developed an immersive virtual reality environment as part of a team to visualize my final architectural project in the uni. Furthermore, the method that I came up with, saved the project almost $800 on equipment costs.

2018 **Produce Department** @ Safeway
Store Number 5146, San Jose, California, US
First job in the US which helped me grow my communication skills.

2017 **Founder & UI/UX Designer** @ Shahr-Yar Startup
Startup Weekend, QIAU, Qazvin, Iran
Gathered a small team to research the economic justification of an idea about software to help municipalities better manage urban development. The proposal was announced to be one of the best solutions to the problem given at the event.
Researched management methods and came up with some innovative Excel and Access projects to help automate tasks and efficiently organize the team.

2015 **Lead Graphic Designer** @ Computer Society
QIAU, Qazvin, Iran
Self-studied how to work with Adobe InDesign and Illustrator and designed a magazine that was under the direct supervision of the faculty.
